-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 7/31/01 was considered by the examiner. A copy of the signed PTO-1449 form is included with this Office Action.

Specification

2. The disclosure is objected to because of the following informalities: on page 7, line 9, "vehicle's 100" should be replaced with --vehicles 110--. It is noted that reference number "100" was originally designated in paragraph [0019] as the exemplary system, not a vehicle.

Appropriate correction is required

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12 and 15-32 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,991,749 (hereinafter "Morrill").

Regarding **claims 1-8**, Morrill discloses a method and system configured to facilitate ordering of goods or services from a vendor by a customer, comprising: one or

Art Unit: 3627

more base stations ("cell antenna", see column 2, lines 29-31) configured to receive an abbreviated dialing sequence that corresponds to an order from a mobile terminal used by the customer (for example, see column 6, line 63 - column 7, line 26); and a processing center ("CPU", see column 2, lines 29-31) coupled between the one or more base stations and the vendor ("payee", see column 5, lines 51-60) and configured to receive the abbreviated dialing sequence, to transmit customer information (it is inherent that the vendor received customer identification information because the vendor is capable of directly billing the user, see column 7, lines 63-65) to the vendor relating to the order, and to bill a wireless account of the customer for a monetary amount of the order (see column 3, lines 20-35); customer preferences are stored in a database (see column 7, lines 43-46); posting abbreviated dialing sequence codes corresponding to the vendor on signs (see column 7, lines 14-16); the location of the mobile terminal is determined (see paragraph bridging columns 6-7, wherein the facility ID number is an indication of the user's location; see also column 4, line 34); and the vendor is a restaurant and the customer is a motorist (see column 3, lines 46-47).

Additional features disclosed by Morrill as required by claims 9-12 and 15-32, that were not addressed above include: billing a credit card or debit card of the customer for a monetary amount of the order (see column 4, lines 16-24); entering into an agreement with the vendor to provide the abbreviated dialing service to the vendor (see column 6, lines 47-62); collecting revenue from the vendor according to the agreement ("transaction fees", see column 6, lines 59-62); and acquiring a preferred manner of payment from the customer (see column 4, lines 17-38).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morrill in view of U.S. Patent No. 5,327,144 (hereinafter "Stilp").

Morrill disclose all the claimed elements as set forth above, but fails to explicitly disclose calculating the location of the mobile terminal based on signal information received at one or more base stations using time delay information and global positioning system information.

Stilp teaches the use of calculating the location of the mobile terminal based on signal information received at one or more base stations using time delay information (see paragraph bridging columns 6-7) and global positioning system information.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Morrill with time delay cellular phone location determination taught by Stilp, because determining the location of a user will allow the user to enter fewer codes but will locate the proper vendor.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Art Unit: 3627

Elliott is cited of interest for disclosing a wireless system and method for drive-through applications.

Brown et al. is cited of interest for disclosing a method and system for specifying an electronic food menu with food preferences.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jim McClellan whose telephone number is (703) 305-0212. The examiner can normally be reached on Monday-Friday from 9:30 to 6:00.
